Mitchell Plant Captures Two Innovations in Safety Awards from PCA

Lehigh Cement Company's Mitchell Plant was recently named winner of two of the Portland Cement Association's Innovations in Safety Awards. The Mitchell Plant was the only operation in North America to receive two of these awards. The plant was recognized at the recent IEEE/PCA 49th Cement Industry Technical Conference.

Ed Epping, Plant Manager said: "I was proud to learn that two of our safety ideas at Mitchell were selected by the PCA judges for the 2006 Safety Innovation Program. We take safety seriously at Mitchell. The lion's share of the credit goes to Cody Hall, our Safety Manager, who made sure that our ideas were summarized and documented with pictures, and then submitted to PCA for consideration. Safety is no accident!"
